

*Manage your line in total safety..
Slip without queue!*

Asset manager

The app that allows you to optimize the management of the row of your store, also providing a booking system for your customers on featured services.

Client

The app that helps you optimize waiting times. Take a number and go to the trusted activity near your turn. You can book a dedicated service by selecting the appointment in the available time slot you prefer.

advantages

for customers

Optimised waiting times

Arrival on site only close to the booked turn

Single agenda

Booking a row or a service on a single list

Notices and updates

Notifications inform when booking approaches

for the activity

Autonomy and easy use

I register my activity on the site and manage the progress of the queue and bookings from my smartphone

Prestazioni

Greater organization in welcoming customers translates into greater care and quality of services

Visibilità

Putting my business within the initiative offers new promotional opportunities

functionality

take a number

It allows you to manage the digital and physical queue of your store using a display and a smartphone or tablet as a remote control.

Customers can book a number and reach you on the spot near their turn while monitoring the progress of the queue.

functionality

Book a slot

It allows a manager to organize entries at their own business or create a special calendar divided into day/time slots. It can also manage the actual attendance, cancel bookings or make new ones.

The customer can consult the list of available slots, book and confirm leaving their details.

for your business

at the activity

You use the remote control to manage row progress, both the APP customer number and the no-APP customer number (paper row).

On the display displayed in favor of the public are displayed the called numbers.

Display

remote control

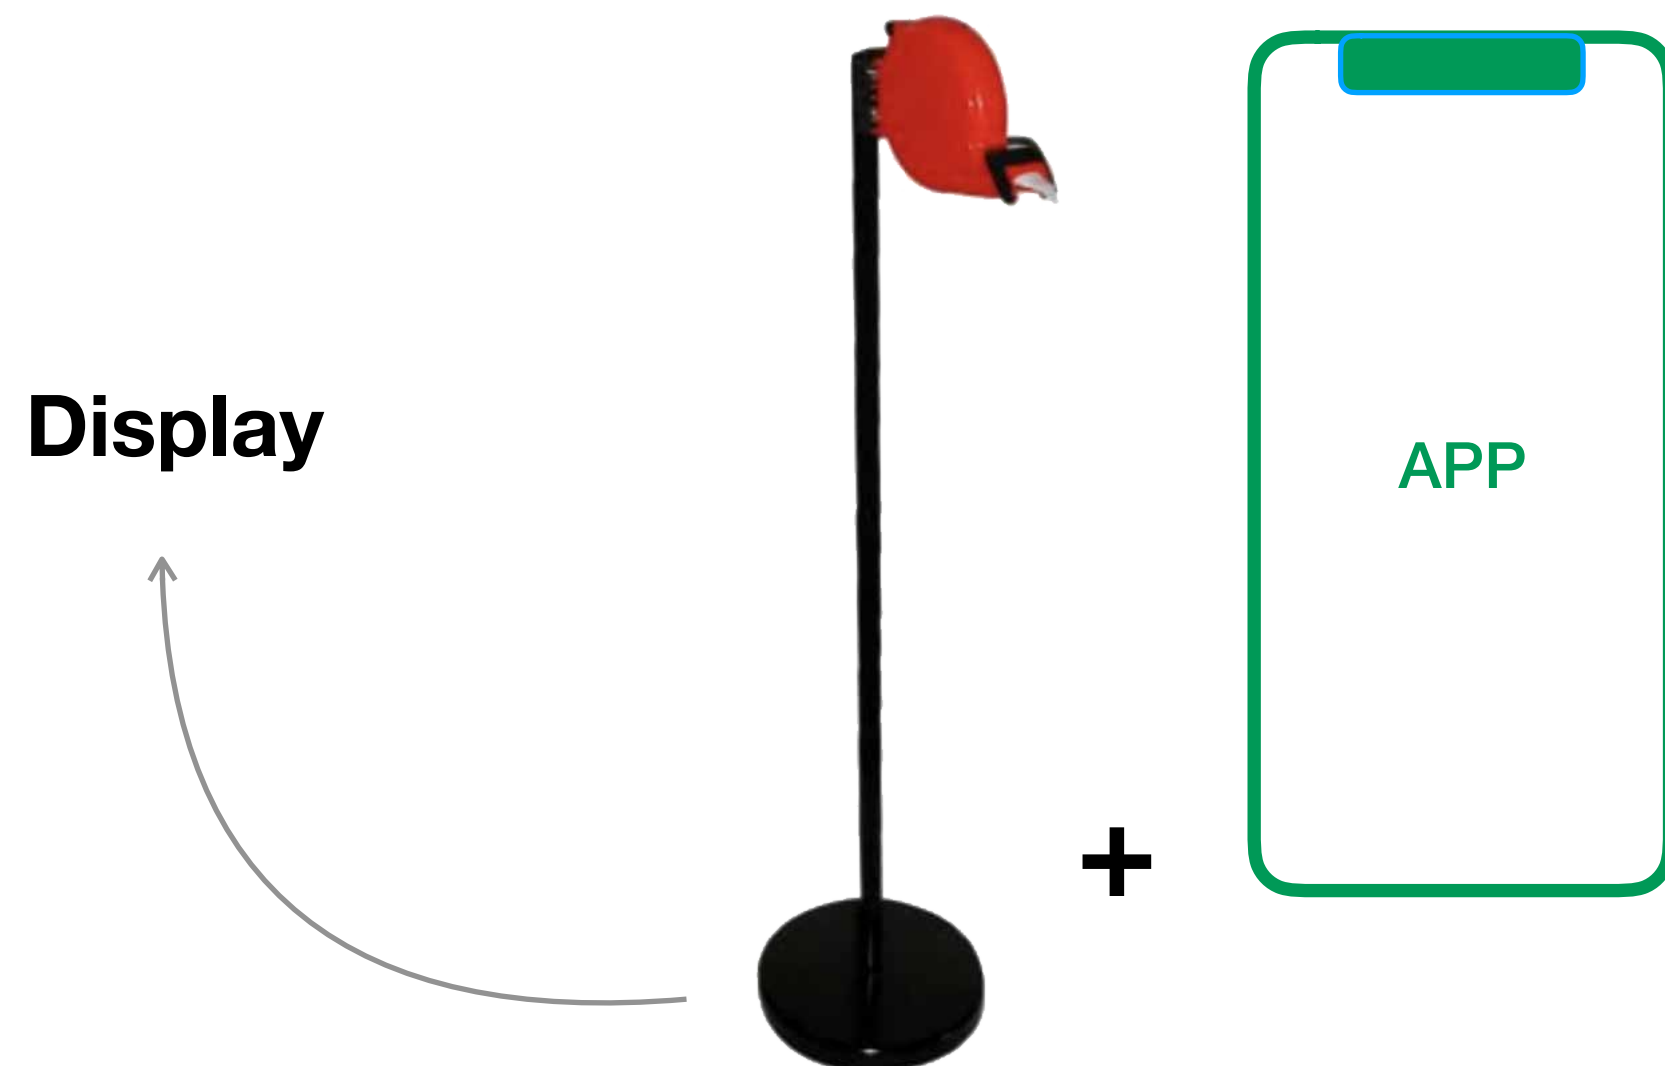

You use the remote control to create new date/time slots and their reservations. It is also used to count the number of times booked.

Take a number: options

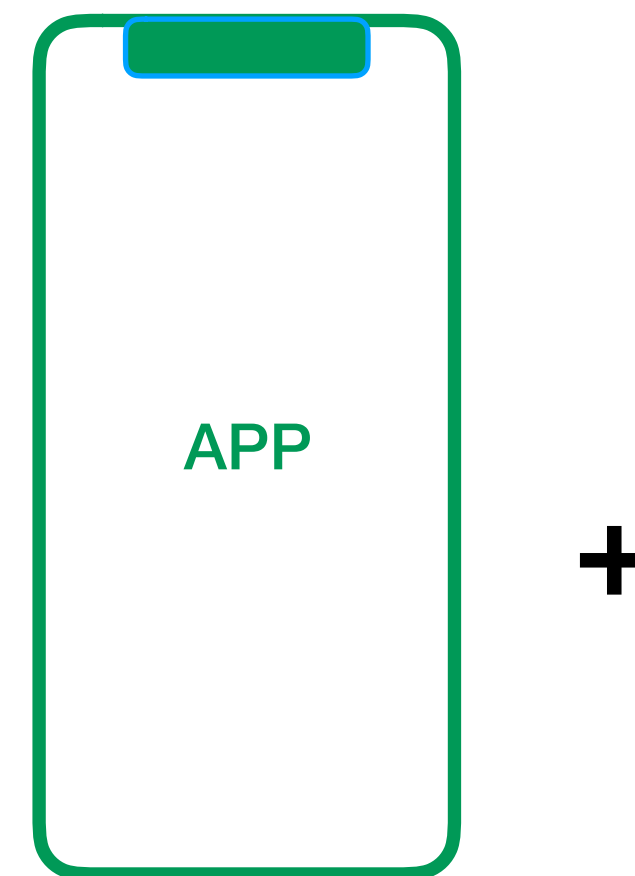

1 hybrid

From the remote control you can manage the advancement of the digital and paper row. The customer can use the app or take the paper number, displaying their turn in the display.

2 digital

From the remote control you can manage the progress of the numbers in a single row. The customer can use the app or take the number from the totem, displaying their turn in the displayed monitor.

for the customer

1

Activity list

List of all activities present and available on the app, you can filter by name, category or distance from us.

2

Activity detail
